

CONCRETE CONSTRUCTION COMPANY, INC.
215 ELLEEN TERRACE • HACKENSACK, NEW JERSEY 07601

May 1, 2024

Dear Residents,

On or About Thursday, May 2nd, we will begin the sanitary sewer and storm sewer main replacements on Chestnut Street from Brayton Street to Lydecker Street for The City of Englewood. It is anticipated that this work will take approximately 4 weeks to complete. The roadway reconstruction and paving will follow once the sanitary and storm work has been completed.

During construction, no Parking will be permitted on either side of Chestnut Street in the limits described above, during working hours (Monday Through Friday, 7:00 AM to 5:00 PM), or wherever "No Parking Signs" are posted.

Prior to excavating in front of driveways, all vehicles will need to be removed by 7:00 AM. Driveway and roadway access will both be limited at times. When driving through the active work zone, please drive carefully and slowly since there are workers, equipment and open trenches in the roadway.

If any resident has any questions or concerns, please see the foreman on site or one of the police officers.

Your patience and cooperation are greatly appreciated.

Sincerely,
New Prince Concrete Construction Company, Inc.
